What is it?:

• This dictation technology allows students to write by speaking aloud.

Who does this work for?:

This assistive technology is a tool that can help students who struggle with writing.

Populations this strategy supports:

• Dyslexia
• Dysgraphia
• Learning and attention deficits
• General Population

How to:

• Many devices already have built in dictation tools.
• These include Windows, MacOS.
• Smartphones & digital tablets
• Chromebooks
• Dictation Apps can also be used (Ex: Dragon Dictation) iOS
• Make sure your students pronounce clearly. Speech-to-text takes practice!

• Not only are they writing with their words, but they will also have to practice speaking their grammar to the dictation technology.
